

I am writing because of the recent proposed rule changes that will give LPFM priority over FM translator services. I am dedicated to listening to K-Love radio in San Antonio. This is a radio station that provides the stress reducing and quality satisfactory Christian music that I prefer to listen to out of all the radio stations that are offered in my local area. From what I understand, if the LPFM broadcasting stations take priority over the current FM translators, which is how K-Love is transmitted (Ref: 91.3; 106.3; and 92.1) through FM translator, then the citizens of San Antonio would no longer be able to listen to K-Love's broadcasts. I am very upset by this possibility since again I mention that K-Love is very much an integral part of my life. I travel to work 40 miles roundtrip, Mon-Friday and very much depend on K-Love to be transmitted from the NW side of town to the South end where I work. K-Love has a big following in San Antonio, and I would not be the only citizen that would be disturbed at the possibility of K-Love being replaced by another program. This should not occur so I write to you to reconsider passing such a ruling that would effect the many listeners of the K-Love radio station in San Antonio, Texas. K-Love radio supports wholesome values and has a positive and encouraging impact on communities all across America. San Antonio K-Love listeners would like to continue listening to our choice of music and would be very unhappy to lose K-Love listening ability in our area. Thank you for allowing comments and listening to a public plea to reconsider this situation.
